

# Measured and Meter-Based Savings Program Solutions from AESC

AESC provides turnkey program design, delivery and support services for measured savings pathway and pay-for-performance programs. Measured savings programs track and pay for grid impacts from energy efficiency, load shifting, and event-based reductions based on normalized utility meter-based measurement and verification (M&V).

## **Program Design Support**

Our team will work with you to design a program that targets specific customers, measures, and incentives that advance your specific energy, equity and grid-impact goals.

## **Program Infrastructure Setup**

Existing program documents, tools, calculators, curriculum, processes, agreements, and M&V platforms can be quickly customized for your program, enabling a rapid program launch.

## **Direct Customer Engagement, Training and Technical Support**

For direct customer engagement programs, AESC can provide customer targeting and recruitment, energy coaching, audit and RCx engineering services, strategic energy management training, and project implementation support.

## **Project Developer Recruitment and Management**

We support engaging and enrolling aggregators and trade pros in your territory who can deliver projects that meet your program objectives. Our easy-to-use program tools and incentive calculators are designed to quickly target projects that deliver the greatest benefit.

## **Project Intake**

We verify project eligibility, perform QA/QC on savings and impact forecasts, and reserves incentive funds.

## **Advanced Measurement and Verification (AM&V)**

Our advanced M&V platform, Praxis, can normalize to weather or other key indicator variables at a site, utilizing a variety of industry-accepted M&V methods, depending on the desired customer participants, project types and program design.

## **Incentive Payments**

AESC pays incentives to the project sponsor based on normalized measured grid impacts, based on incentive structure and payment timing determined in program design.

## **Forecasting and Reporting**

AESC performs ongoing program impact and incentive forecasting, budget management, and program reporting for the administrator and any regulatory requirements.

Whether you are looking for turnkey program design and delivery, or targeted support services to augment your existing programs, AESc can help you increase targeted grid benefits through measured savings approaches.
